Success with Wellan Water Refiner Ring

I, JK Fischer, am a fitter in my above company and purchased a Wellan Ring in 2010, which I installed on the water supply line shortly after the water meter. Around the same time I installed a 200 liter hot water heater out of necessity. This had to be replaced in March 2023. When opened, the inside looked like new (no deposits) compared to other hot water heaters my clientele had that didn't have a Wellan ring on their water pipes. There were deposits up to a quarter of the volume in the container.

This convinced me to warmly recommend the ring to my clientele.

If you have any questions, please do not hesitate to contact me via the Internet, see email above.
