South Africa.

Dear Terry,

**Re: Testimonial – Wellan 2000 Water Purification Ring**

This is to confirm that I fitted a Wellan 2000 Water Purification Ring at our property in 2014 when we arrived in Merrivale, KwaZuluNatal. The water quality was fair but there was a distinct chemical flavour in the water, in particular Chloride.

Since fitting the ring we have very clear, clean and untainted water coming through the taps. The pressure of the water has also improved since fitting the ring. Our water became drinkable with no chemical after taste.

We also had an issue with the a geyser when we arrived and had to fit a new one as there was lime scale build up in the geyser. Since fitting the ring our power costs have reduced and we have had no further issues with the geysers or hot water supply.

I would recommend the fitting of a Wellan 2000 Water Purification ring in Residential or Commercial environments as it removes lime scale, softens the water and reduces geyser energy costs.

Kind regards

John & Sue Ross
